

## Tower Portfolio Management

Expert Independent Analysis  
& Strategic Advice

# 01 Tower Portfolio Analysis

We are an asset management company specialising in the evaluation, management and optimisation of telecommunications tower infrastructure on a portfolio wide basis

We support the tower industry by providing independent risk management, revenue optimisation and management strategies

# 02 Value Creation

We add value by creating strategies that minimise risk, optimise revenues and create efficiencies. We do this using our own software tools, Optimise and Mastmanager which help us understand the underlying asset and lease quality at both micro and macro level

We have over 25 years experience in network rollout management, tower development and ownership, tower aggregation, tower capital and lease management combined with a background in real estate asset valuation and management. This uniquely positions us to assess tower assets and advise on effective portfolio wide management strategies

# Bespoke Service 03

The Tower industry is growing in scale and complexity . Stakeholders often seek an independent view.

Our service is responsive , dynamic and provided on a bespoke project basis tailored to your organisations needs
